

### **Microblading/Eyebrow Embroidery Consent Form**

This form is designed to give information needed to make an informed choice of whether or not to undergo Microblading/Eyebrow Embroidery/3-D Brow semi-permanent makeup application. If you have any questions, please don't hesitate to ask. Although Microblading/Eyebrow Embroidery is effective in most cases; however, no guarantee can be made that a specific client will benefit from the procedure. \_\_\_\_\_

Microblading is the process of inserting pigment into the basal layer of the epidermis. It is a form of tattooing, though semi-permanent. All instruments that enter the skin or come in contact with body fluids are disposable, and disposed of after each use. Cross contamination guidelines are strictly adhered to. Generally the results are excellent. However, a perfect result is not a realistic expectation. It is usual and advised to expect a touch up treatment after healing is completed. This will usually occur no sooner than 30 and no later than 60 days after the initial treatment.

Initially the color will appear more vibrant or darker compared to the end result. Normally the color will fade 40-50% within 5-7 days, leaving a softer more natural look. The pigment is semi-permanent and will fade over time.

Additional touch ups will likely be needed anywhere from 6 months up to 2 years. \_\_\_\_\_

The cost of the procedure includes one touch up.

This touch up must be completed within 60 days of the initial treatment.

Any touch up performed after 60 days will require additional payment. \_\_\_\_\_

### **Photography Release Consent**

We would like your permission to use your photos for advertising. For example: portfolios, website, social media, etc... Your consent is necessary regarding this. Please circle your choice:

**YES** Feel free to use them      or      **NO** Please do not use them.
